NOTICE.

THE coins now offered are, with very few exceptions, in excellent condition (generally select specimens); very many extremely fine, and many in the most perfect and brilliant state; and, as in the case of the exceptionally choice Sparkes cabinet, it has been decided to omit the usual endless repetitions of the terms "very fine," &c., (often much too indiscriminately used). Many specimens in this cabinet, therefore, which might fairly be particularised as "superlatively fine," "perfect gems," "rare to excess," &c., &c., are simply described with technical accuracy, and left to personal observation and individual judgment. Many might be suggested to be at least equal in condition to any specimens extant; but the suggestion is very sparingly made. On the other hand, the very few that are poor, pierced, or otherwise injured, are carefully stated to be so.

It is supposed that more than a few of the coins are unpublished and unique, or almost unique; but, lest we should prove to be not sufficiently well "posted" in the very latest discoveries, and numismatic literature, this point also is left to the well-informed connoisseur.

Our own judgment being adverse, or unsatisfied, as to the authenticity of a very few which have been believed in by numismatists of great experience, the doubt, or more than doubt, will be found expressly stated; and in commending this selection of coins generally to the careful

personal examination of the intending purchaser, without obtruding any recommendation or authority whatever upon him, we would adopt the formula used in the Notice prefixed to Lord Northwick's Sale Catalogue, that, "as a "difference of opinion may, and probably will, arise with "respect to the authenticity of others, it has been deemed "desirable to respectfully notify that all purchases are "expected to be made upon the individual judgment of the "purchaser."

Perhaps it may be worth while to add that the whole collection is private property, acquired by a zealous and hereditary amateur, during a long life, and by those from whom some portions have devolved.

*** The weight is abnormally high, but this coin is particularised by Prof. Gardner in his excellent monograph on the Coins of Elis; and it may be unique. The question

of genuineness is, of course, entirely left to the independent judgment of the purchaser, as in all other cases. But for the high weight, to which we consider it right to invite attention, we think that the coin, which is altogether a very fine one, could not be suspected for a moment.
